

## Kelly Walker — Baltimore Art Star, llc

**Kelly Walker** landed in Charm City in 1994 by coincidence, grace and luck. Hired as an apprentice for a premier decorative painting company in 2000, she was instantly attracted to the subtle sophistication of interior design, the atmospheric and tonal quality of various paint finishes, and the ability of art to transform and dictate a space. An artist of the self taught variety, Walker is influenced by the many layers of Baltimore's rich history, as well as the experience of being one among many of the characters and energies that live here. Gritty and elegant, intellectual and simple, this city is, by nature, a multitude of layered mediums. Walker's

canvas' mimic her restless pursuit as a self starter, her artistic development in Baltimore, and the juxtaposition of aesthetic design and internal drive. This current body of work reflects her ongoing commitment to surface quality and color, and her total surrender to the inherent power of the mediums with which she works.

"This is going to be the biggest event I have ever been a part of and it's a solo exhibition in the hottest space I've ever shown in. Needless to say I am very excited and hopeful about a big turnout and a lot of good energy surrounding my creative work. I live in a creative world and art is why I get up in the morning. The work in this show is a completely new breed of old and new, and a mix of them both

on canvas.

My work is full of energy, layers, textures, depth and color, a lot like me really. The work is decorative and powerful. Like my boisterous personality, my work can totally dictate a space, and so can my paintings. I want people to collect me, not just my art; there's a lot behind both of us..."

**Kelly Walker — Artist / Decorative Painter**
