

ePLANET

Fink Productions presents the award winning ePLANET Rainforest Quest / Central America, the first in a series of educational programs for children designed to inform and motivate. With Timo and Dina as their guides, children are taken into the rainforests of Mexico, Belize, and Costa Rica, where they discover first hand the science behind the scenery by visiting lagoons, mangroves, cloud

forests, and volcanoes. They learn about animals and plant life, take a trek down a medicinal trail to see the connection between plants and medicine, and begin to understand exactly why our environment – and jungles in particular – are so important, what people are doing to protect and preserve them, and what they can do in their own communities to improve our environment.
